October 2026

COMPUTING 2&1
ESSAY AND OBJECTIVE

2 hours

Do **not** *open this booklet until you are told to do so. While you are waiting, read and observe the following instructions carefully. Write your* **name, index number, signature,** *and* **date of examination** *in* **ink** *in the spaces provided above.*

This booklet consists of two *papers. Answer Paper* 2 *which comes first, in the booklet and Paper* 1 *on your Objective Test answer sheet. Paper* 2 *will last* 1 hour 15 minutes. *Do* not *start Paper* 1 *until you are told to do so. Paper* 1 *will last* 45 minutes. *At the end of the examination, submit the* entire *question paper to the invigilator.*

PAPER 2 1hour 15minutes
ESSAY
[60 marks]

This paper is in **two** *sections* **A** *and* **B**. *Answer Question* **1** *in Section* **A** *and any other* **three** *questions in Section* **B**.

Answer **all** *the questions in the spaces provided in this question paper. At the end of the examination, you should submit the* **entire** *question paper to the invigilator.*

Any candidate who tears off any part of the question paper will be **severely** *penalized.*

Whether you answer all the questions in this paper or not, hand in the **entire** *question paper to the invigilator.*

Credit will be given for clarity of expression and orderly presentation of material

SECTION A
[24 marks]

Answer Question 1
[Compulsory]

Academicprep.com
Learn • Practice • Excel

1. (a) A school is considering a digital system to track students' attendance. For this system, unique student ID cards will be scanned to capture and store each student's information. Each card shows the student's name, a card number, expiry date, and a series of black and white lines printed along the bottom edge, which a scanner can read directly into the computer.

(i) Name the ID card feature described above that makes direct data entry of student information possible.

.....

[2 marks]

(ii) Which device could be used to capture student information from this feature?

.....

[2 marks]

(iii) An expert in computer systems has recommended using a Solid-State Drive to store the information captured from the ID cards. Give **two** reasons for this choice.

.....

.....

.....

.....

[4 marks]

CamScanner

(b) As part of the same system, students at the school write short algorithms to practice the logic they will later use in real programs. The algorithm below lets a student repeatedly guess a hidden number until the guess is correct.

```
1 SET mysteryNumber TO 6
2 SET correct TO False
3 WHILE correct = False DO
4     RECEIVE guess FROM (INTEGER) KEYBOARD
5     IF guess = mysteryNumber THEN
6         set correct to True
7     END IF
8 END WHILE
```

(i) Identify the variables in the program.

.....

.....

.....

[2 marks]

(ii) State why each of the variables identified in (b)(i) above is used.

(c) The same school also wants to make its classrooms more accessible, and its computing club procures six pieces of assistive and adaptive technology equipment to support students living with disabilities. Each device is described below. Use the descriptions to answer questions (i) to (iii)

I: *A small device worn behind the ear that makes sounds louder for someone hard of hearing.*

II: *A tablet loaded with a picture-based app that helps a non-verbal student communicate.*

III: *A strap-on handle that helps someone with a weak grip hold a spoon or fork.*

IV: *An artificial limb that replaces a leg below the knee.*

V: *A chair that helps someone with limited mobility move around.*

VI: *A keyboard with raised dots that a visually impaired person can read by touch.*

(i) Name the devices described above in I to VI.

I: .....

II: .....

III: .....

IV: .....

V: .....

VI: .....

Answer **all** *the questions.*

Each question is followed by **four** *options lettered* **A** *to* **D**. *Find the* **correct** *option for* **each** *question and shade* **in pencil** *on your answer sheet the space which bears the same letter as the option you have chosen. Give only* **one** *answer to each question. An example is given below.*

A group of files are stored in a

A. graphic
B. folder
C. text
D. word

The correct answer is folder, *which is lettered* **B** *and therefore answer space* **B** *would be shaded.*

A [redacted] C D

Think carefully before you shade the answer spaces. Erase completely any answer you wish to change.

Do all your rough work in this question paper. Now answer the following questions

1. Which of the following cell references in Excel is absolute?
   A. $A1$
   B. A1
   C. A$1
   D. $A1
2. The act of gaining unauthorized access to computer systems is called
   A. encryption.
   B. hacking.
   C. debugging.
   D. firewalling.
3. Which layer of the OSI model is responsible for routing and forwarding?
   A. Physical
   B. Data Link
   C. Network
   D. Transport
4. You can search for an exact phrase when searching the web for information by
   A. use of an asterisk (*).
   B. using quotation marks ("").
   C. using a question mark (?).
   D. typing the phrase backwards.
5. The robotic club of Zuarungu JHS is to construct a robot with the ability to detect objects around it. The most appropriate sensor to be used is
   A. light sensor.
   B. tactile sensor.
   C. torque sensor.
   D. proximity sensor.
6. The acronym RFID stands for
   A. Random File Integration Device.
   B. Radio Frequency Identification.
   C. Rapid File Interference Detection.
   D. Remote File Interaction Device.
7. Which of the following is a disadvantage of portable computing devices?
   A. Portability
   B. Limited battery
   C. Multitasking
   D. Compact size
8. Which of the following is an example of assistive technology?
   A. Keyboard
   B. Screen reader
   C. Bluetooth speaker
   D. Selfie stick
9. If you want to count how many cells in a range contain numbers, which function would you use?
   A. COUNTA
   B. COUNT
   C. COUNTIF
   D. SUM
10. A publishing company wants to produce a storybook that visually impaired children can read using their fingertips. Which type of printer is able to produce tactile output?
    A. Inkjet Printer
    B. Thermal printer
    C. Braille printer
    D. 3D printer
11. The protection method which ensures that only authorized persons can access certain information is
    A. authorization.
    B. authentication.
    C. encryption.
    D. decryption.

12. What type of attack occurs when an unauthorized person reads or listens to private information?
A. Interruption
B. Interception
C. Modification
D. Fabrication

13. Which of the following contributes to the environmental impact of computers?
A. Minimal power consumption
B. Short product life cycle
C. Efficient use of resources
D. Short manufacturing processes

14. The default page size in Microsoft Word is
A. A4.
B. Letter.
C. Legal.
D. Executive.

15. To find articles about climate change on the BBC website, the search query you would use is
A. bbc.com climate change.
B. "bbc.com"
C. NOT bbc.com climate change
D. climate change

16. Generating fake data to deceive users or systems is termed
A. duplication.
B. fabrication.
C. infringement.
D. modification.

17. How many layers are in the OSI model?
A. 5
B. 6
C. 7
D. 8

18. During a computing lesson, a student presses a shortcut key and a picture of the entire desktop appears on the current slide. In PowerPoint, a captured image of your screen displayed in a slide is a
A. slideshow.
B. screenshot.
C. snap slide.
D. template.

19. Which Boolean operator would you use to find webpages containing both "Ghana" and "Accra"?
A. OR
B. NOT
C. AND
D. THEN

20. Which component of a robot serves as its "brain"?
A. Sensors
B. Controller
C. Mechanical system
D. Wheels

21. A student typing a report wants to arrange his data into neat rows and columns rather than plain paragraphs. Which of the following set of actions will add a table to a Word document?
A. Click on Insert tab, select Table
B. Click on Home tab, select Table
C. Click on Layout tab, select Table
D. Click Design tab, select Table

22. Calculate the result of the expression (18– 6) –5 + 4^2/ 8*3 using the order of operations.
A. 7
B. 13
C. 18
D. 21

23. Which layer of the OSI model ensures data is presented in a readable format for the application layer?
A. Application
B. Presentation
C. Session
D. Transport

24. Retrieving encrypted information and restoring it to its original state is termed
A. encoding.
B. decryption.
C. transmission.
D. encryption.

25. To narrow down results by date, language and region using a search engine, use
A. Basic Search.
B. Simple Search.
C. Quick Search.
D. Advanced Search.

26. Which storage device is known for being robust and resistant to physical shocks?
A. Hard Disk Drive
B. Solid State Drive
C. Optical Drive
D. Magnetic Tape

Acadmicprep.com

Turn over

CamScanner

27. Maintaining the accuracy and reliability of data over its entire life cycle constitutes data
A. monopoly.
B. availability.
C. integrity.
D. confidentiality.

28. Which Boolean operator would you use to find webpages about "cars" but exclude "trucks"?
A. AND
B. OR
C. NOT
D. PLUS

29. One key feature of robot intelligence is the
A. unlimited memory.
B. ability to perform tasks autonomously.
C. access to social media.
D. absence of power requirements.

30. Which type of storage device is most likely to be used in a smartphone?
A. Hard Disk Drive (HDD)
B. Solid State Drive (SSD)
C. Embedded Flash Memory
D. Optical Drive

31. A teacher wants to count only the students in a list who scored above 50 marks, not just any numeric cell. Which function is used to count cells that meet a specific condition in a list?
A. COUNT
B. COUNTA
C. SUM
D. COUNTIF

32. What type of processing is a key feature of Fifth-Generation computers?
A. Batch processing
B. Parallel processing
C. Time-sharing
D. Sequential processing

33. The act of sending fraudulent emails to obtain personal information is called
A. phishing.
B. debugging.
C. cracking.
D. encrypting.

34. Which of the following is a built-in function in a spreadsheet program?
A. =D5+3
B. ADD(A1, B1)
C. =SUM(C1:C10)
D. TOTAL

35. An architecture student wants to produce a physical three-dimensional model of a building she designed on her computer. Which type of printer is most suitable?
A. Impact printer
B. Inkjet printer
C. 3D printer
D. Thermal printer

36. The default starting number for page numbering in Word is
A. 0.
B. 1.
C. 2.
D. 3.

37. The two main page orientations available in most documents are
A. landscape/ centre.
B. portrait/ centre.
C. justify/ centre.
D. landscape/ portrait.

38. Which of the following is a good practice for reducing eye strain while using a computer?
A. Increasing screen brightness.
B. Using a screen protector.
C. Sitting very close to the screen.
D. Avoiding blinking.

39. Assignment statements are used in programming to
A. perform calculations.
B. assign a value to a variable.
C. check a condition.
D. print a message.

40. When a hacker changes the content of a message before it reaches the receiver, it is called
A. interruption.
B. interception.
C. modification.
D. fabrication.
