Basic Education Certificate Mock Examination

CAREER TECHNOLOGY 2 & 1 — 2 hours 5 minutes

Essay and Objective
[100 marks]

Write your ***name, index number, in ink*** *in the spaces provided above and complete the title block on the A3 drawing sheet(s) provided.*

This booklet consists of two papers: Paper **2** *and Paper* **1**

Paper 2 is in two parts: **A** *and* **B**. *Answer* ***four*** *questions only.*
Questions **1** *and any other one in Part* **A**;
Questions **4** *and any other one in Part* **B**.

Answer **Part A** *of Paper* **2** *in this booklet and answer* **Part B** *of Paper* **2** *on the* **A3** *drawing sheet(s) provided.*
Both sides of the **A3** *drawing sheet may be used. All diagrams or drawings should be in* **pencil**. *Any other answer should be written in ink.*

Any candidate who tears off any part of this question paper will be ***severely*** *penalized.*

Paper **2** *will last* **1** *hour* **15** *minutes after which this booklet and the drawing sheet(s) will be collected*

Answer Paper **1** *on your Objective Test answer sheet.*

Do **not** *start Paper* **1** *until you are told to do so. Paper* **1** *will last* **50** *minutes.*

PAPER 2
ESSAY
PART A
[30 marks]

1 hour 15 minutes

Answer Question **1 [Compulsory]** *and* **any** *other question.*

1. Your class was divided into five groups for a practical lesson in baking biscuits. The group you joined were given, a quantity of flour, margarine, salt and sugar.

(a) As the leader of the group, describe briefly and in six stages, how to prepare shortbread- style biscuits with the given ingredients.

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

[6 marks]

(b) State **one** function **each** of the following ingredients used for the preparation of shortbread-style biscuits:

(i) flour;

.....

.....

[2 marks]

(ii) fat/ margarine.

.....

.....

[2 marks]

CamScanner

(c) Name any **three** equipments used for the preparation of the biscuits.

.....

.....

.....

[3 marks]

(d) Mention any **two** ingredients that are added to flour products to give more flavour.

.....

.....

[2 marks]

2. (a) (i) Terminologies like food commodities and food ingredients are used in the food laboratory. As a career technology student, state the difference between *food commodities* and *food ingredients*.

.....

.....

.....

.....

.....

.....

[4 marks]

(ii) Give **two** examples **each** of food commodities and food ingredients.

.....

.....

.....

.....

[2 marks]

(b) (i) Maintaining food hygiene is very important to keep consumers healthy and strong. Amina wants to prepare fried fish with pepper and kenkey for her guest. What **three** qualities should Amina observe to buy fresh fish from the market?

.....

CamScanner

.....

.....

.....

.....

[3 marks]

(ii) Identify any **two** nutrients that Amina's guest obtain from eating the meal served.

.....

.....

[2 marks]

(c) Fabrics are made from natural or synthetic fibers. Give **two** examples **each** of natural fabrics and synthetic fabrics.

.....

.....

.....

.....

[4 marks]

3. (a) (i) You have been tasked to take the body measurements of a girl who wants to sew a short- sleeve, waist length blouse. Mention **eight** key body measurements you will take before cutting and sewing the blouse.

.....

.....

.....

.....

.....

.....

.....

.....

CamScanner

.....

.....

.....

[3 marks]

(b) Your classmate approached you to help her prepare a short message on personal hygiene.

(i) How would you explain personal hygiene?

.....

.....

.....

[2 marks]

(ii) Mention any **two** key practices one should observe to maintain personal hygiene.

.....

.....

[2 marks]

(c) Current global changes encourage individuals to become entrepreneur after completing school. To become a successful entrepreneur, state any **four** qualities an individual must exhibit.

.....

.....

.....

.....

.....

.....

[4 marks]

PART B

[30 marks]

Answer Question **4** **[Compulsory]** *and any other* **one** *question.*

Figure 1 shows a try square produced from a 4 mm mild steel plate, shown in Figure 2. The line AB on Figure 2 is a straight line marked to start the preparation of the try - square.

CamScanner

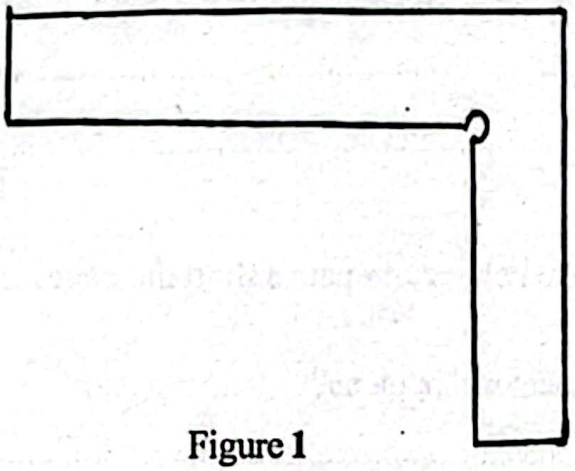

Figure 1

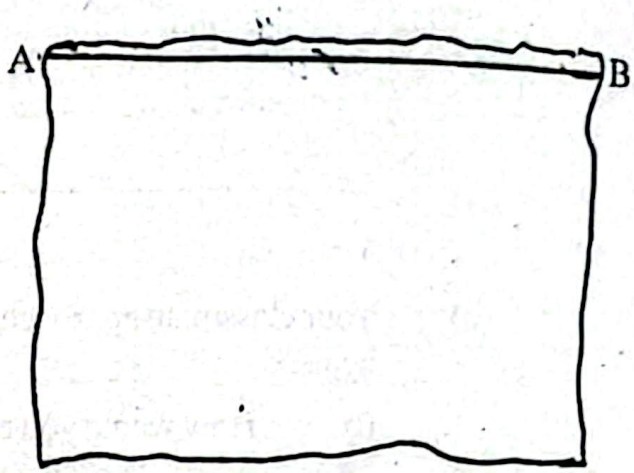

Figure 2

(a) Re-arrange the following procedures for making the try- square in a sequential order.

I. File to size and test for straightness and squareness.
II. Saw off all unwanted portion.
III. Mark a straight line at 90^0 to side AB.
IV. Dot punch the line AB.
V. Dot punch and fill to the line.
VI. Mark out the outline of the try-square.
VII. Fill to the line and test for straightness.
VIII. Test for straightness and squareness.
IX. Remove all burrs and clean surface of workpiece.
X. Dot punch outline and drill the hole. [10 marks]

(b) Name any **six** tools that would be used to construct the try-square. [3 marks]

(c) State any **two** properties of the mild steel. [2 marks]

(a) State **one** difference between **each** of the following pairs of equipment used in the workshop:

(i) rivets and bolts;
(ii) ball pein hammer and claw hammer;
(iii) firmer chisel and bolster. [6 marks]

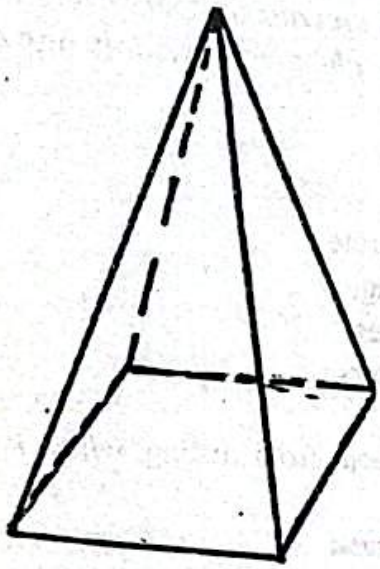

(b) Non-ferrous alloys is a mixture of two or more non-ferrous metals. The table below shows a non-ferrous alloy, its composition, properties and uses. Copy and complete the table.

Non-ferrous alloys	Composition	One property	One use
Brass			
Bronze			

[9 marks]

CamScanner

6. The figure below shows a square pyramid that has a vertical height of 7 cm and the length of one side of the base is 4 cm.

(a) Draw full size and in first angle projection, the:

(i) front view;
(ii) plan;
(iii) surface development. [11 marks]

(b) State **two** reasons for **each** of the following practices:

(i) adding sand to mortar;
(ii) mixing emulsion paint with water. [4 marks]

END OF ESSAY TEST

DO NOT TURN OVER THIS PAGE UNTIL YOU ARE TOLD TO DO SO.

YOU WILL BE PENALIZED SEVERELY IF YOU ARE FOUND LOOKING AT THE NEXT PAGE BEFORE YOU ARE TOLD TO DO SO.

CamScanner

Answer all **the** *questions.*

Each question is followed by **four** *options lettered* **A** *to* **D**. *Find the* **correct** *option for each question and shade* **in pencil** *on your answer sheet the answer space which bears the same letter as the option you have chosen. Give only* **one** *answer to* **each** *question. An example is given below.*

Tools are oiled after use to
A. ensure they remain accurate.
B. prevent them from rusting.
C. preserve the cutting edges.
D. maintain their attractiveness.

The correct answer is prevent them from rusting, *which is lettered B and therefore answer space C would be shaded.*

[A] [B] [C] [D]

Think carefully before you shade the answer space; erase completely any answers you wish to change.

Do all rough work on this question paper.

Now answer the following questions.

1. Fabrics are produced from plant fibre. Which of these is **not** from plant fibre?
A. Cotton
B. Linen
C. Wool
D. Rayon

2. A nurse advised Araba to consume enough food that contains iodine. Araba should choose from all the following **except**
A. eggs.
B. shrimp.
C. fresh fruits.
D. cheese.

3. Which of a days meal for a toddler should water melon be served?
A. Breakfast
B. Lunch
C. Supper
D. Morning snack

4. When preparing the batter for pancake, Esi used one of the following as raising agent to lighten the mixture.
A. Egg
B. Butter
C. Milk
D. Baking powder

5. Asana went to buy maize for corn dough. She considered all the following factors for a quality maize **except**
A. maize should be firm to touch.
B. there should be small holes in maize.
C. maize should be dry.
D. maize should not be broken grains.

6. When taking the body measurement of Haruna, the trouser out-seam measurement is taken from

CamScanner

A. inside of leg from crotch point where seams meet to hem.
B. waist to knee and from knee to hem.
C. outside of leg at side seam from bottom of waist band to hem
D. outside of leg at side seam from top of waist band to hem.

7. In a local kitchen, a woman used an empty margarine tin to measure rice. What is the woman practicing?
A. Table manner
B. Portion control
C. Good grooming
D. Food security

8. Steam, heat and cooking odours are easily removed from the kitchen when the kitchen is well
A. decorated.
B. ventilated.
C. illuminated.
D. painted.

9. Most food commodities are classified as non-perishable. Which of the following is classified as perishable food commodity?
A. Cooking oil
B. Plantain
C. Beans
D. Gari

10. The absorption method for cooking rice is also known as
A. frying.
B. boiling.
C. roasting.
D. baking.

11. Issah wants to prepare kebab for a party. Which of the following will help him hold the pieces of meat and vegetables together before grilling?
A. Spatula
B. Trussing needle
C. Whisk
D. Skewer

12. A good practise by a caterer to ensure that food prepared provides adequate amounts of food nutrients to the body is
A. table manners.
B. cover sauce pan when cooking.
C. food hygiene.
D. portion control.

13. Which property of paper should Raymond consider when buying a paper for his art work such that images on one side are **not** seen clearly on the other side?
A. Opacity
B. Oblique
C. Translucency
D. Transparency

14. Rita prepared chicken light soup but want to have it thick. Which of the following will **not** serve Rita's purpose when added to the soup preparation?
A. Cornstarch slurry
B. Blended ginger
C. Blended garden eggs
D. Tapioca flour

15. Various dishes are served at dining after taking the main meal. What suitable description is given to such dishes?
A. Ganisher
B. Dessert
C. Lunch
D. Appetizer

CamScanner

16. The best fabric for sewing a suit for a young boy must contain a high percentage of
A. rayon.
B. nylon.
C. cotton.
D. silk.

17. The most common cooking method for preparing rock buns is
A. roasting.
B. grilling
C. baking.
D. boiling.

18. A dressmaker wants to use stitches that she will later remove after applying a permanent stitch. Identify the stitches that are applied and removed later.
A. Backstitch
B. Basting stitch
C. Running stitch
D. Machine stitch

19. A fullness technique applied on a tailored trousers is
A. darts.
B. flares.
C. gathers.
D. pleats.

20. An entrepreneur may have all the following charateristics but the one that can cause failure is
A. selfishness.
B. self-confidence.
C. hardworking.
D. resourceful.

21. Mirinda used tiles on the walls of the bathroom. What appropriate finish should be applied on the door?
A. Turpentine
B. Oil paint
C. Lacquer
D. Emulsion paint

22. Anthony took a cold chisel that has mushroom head. To use the cold chisel safely, how would Anthony remove the mushroom head?
A. By heating in a furnance
B. By sawing off the head with a hacksaw
C. By hammering down the mushroom head
D. By grinding off the mushroom head on a grinding machine

23. To produce a mortice and tenon joint in a wood workshop, all the following tools are needed **except**
A. try square.
B. mortice gauge.
C. tenon-saw.
D. gauge rod.

24. A block layer ensures that vertical continous joints are avoided in the wall. This practice is known as
A. plumbing.
B. batching.
C. bonding.
D. plastering.

25. When classifying metals, a set of metals that contain high percentages of iron are classified as
A. alloys.
B. ferrous.
C. non-ferrous.
D. non- alloys.

26. When producing desks for learners in a school, the designer considered the age and size of learners. Which aspect of design is considered here?
A Economics
B. Construction

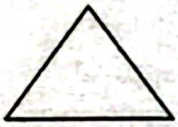

CamScanner

C. Ergonomics
D. Aesthetics

27. A career technology student was asked to observe a cone placed on its side that makes it stable. Which of the following represents the base of the cone?

A. 

B. 

C. 

D. 

28. A learner is tasked to construct a wooden picture frame. All the following are classified as a strong joint for the frame **except**
A. butt joint.
B. halflap joint.
C. miter joint
D. dowel joint

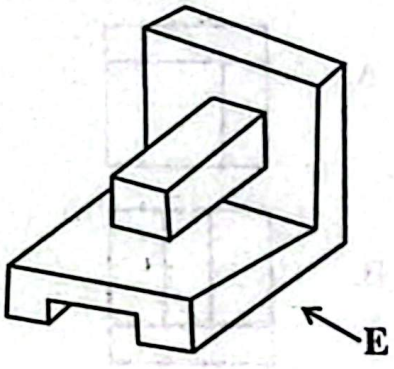

29. Which of the following mechanisms are used in designing caps of water bottles and car jacks?
A. Gear system
B. Cam mechanism
C. Crank mechanism
D. Screw mechanism

30. In third angle orthographic projection, where is the plan located?
A. Directly above the front view
B. Directly below the end view
C. Directly on the left side of the front view
D. Directly on the right side of the front view

31. An observer realised the colour of paint on a wall changes when light hits the surface. This type of paint is described as
A. thermochromic paint.
B. photochromic paint.
C. thermometric paint.
D. thermotric paint.

32. A craftman used the safety boot to protect the feet. Which of the protective items will he use to protect the head?
A. Scarf
B. Apron
C. Goggle
D. Helmet

The block in the figure below shows an item made of wood. Use it to answer questions **33** *to* **35**.

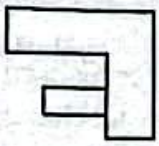

33. Which of these represents the front view in the direction of arrow E?

A. 

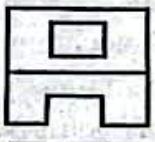

B. 

C. 

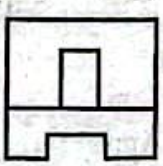

CamScanner

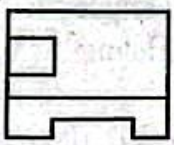

D. 

34. The end view is represented by

A. 

B. 

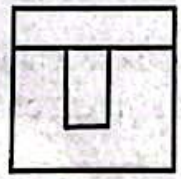

C. 

D. 

35. Identify the plan from the following.

A. 

B. 

C. 

D. 

36. To prevent a drill bit from wandering when drilling into a 3 mm metal workpiece, a craftman must
A. slow the speed of the machine.
B. locate the centre by punching a stant hole.
C. hold the workpiece at 45°.
D. oil the surface of the workpiece.

37. A designer of an artefact is able to identify the strengths and weakness of the artefact by
A. applying a finish.
B. using strong joints.
C. analysing the operational sequence.
D. testing and evalution.

38. The baking pans are constructed and produced from tin sheet metals. What tool is used for cutting the shape needed for a pan?
A. Chisel
B. Scriber
C. hacksaw
D. Snips

39. Triangulation applied in structures enables the structure to be
A. heavy.
B. stable.
C. light in weight.
D. attractive.

40. The most common adhesive used to reinforce and bond woodwork joint is
A. contact glue.
B. rivets.
C. polyvinyl acetate.
D. polyvinyl chloride.
